SUMMARY

People Operations professional with hands-on ownership of the full employee lifecycle—recruitment, onboarding, HR documentation, employee records, policy implementation, and compliance. Proven experience driving end-to-end hiring using automation and AI-powered tools (ChatGPT, Claude, Gemini, Notebook LM, Google AI Studio) to streamline sourcing, screening, and candidate pipeline tracking, reducing time-to-fill and manual workload. Comfortable identifying repetitive HR/operational workflows and implementing automated or AI-assisted solutions to improve scalability and accuracy. Experienced building trackers and reporting systems for hiring pipelines, onboarding status, and performance flags; partnering directly with leadership on organizational development, process improvement, and policy decisions. Strong communicator, confident operating with high discretion in fast-scaling, remote-first, founder-led environments.
